### Abstract

This paper describes how to check the authenticity of a journal using the Web of Science (formerly Thomson Reuters). The majority of researchers do not know how to check the indexing of a journal in the Thomson Reuter's database or in the Web of Science. In this study, we will use the research journal, Nature, as an example. The extensive indexing of the Web of Science includes ISI, SCI, SSCI, SCIE, ESCI, and AHCI.

Keywords: Indexing; Web of Science; Thomson Reuters; ISSN

#### Procedure to Check Indexing in web of Science

A step-by-step procedure to check the indexing of a journal in the Web of Science (Thomson Reuter) database is show in Figures 1–6 below.

Figure 2 displays how a journal can also be searched by using its ISSN number. In this case, the ISSN number is entered. Next, ISSN is selected from the dropdown tab below the number, and then you simply click on the blue search tab to browse.

For example, in Figure 3, we will use the well-known journal, *Nature*.
