ABSTRACT

Now a day's we can see many road related problems like a hole on road, garbage will be beside the road, sewage lines does not covered properly and many more which is rely on NMC through corporator. Due to busy schedule of corporator they not able to locate the actual problem in their areas. In our web application we will provide a web portal in which the public will directly complaint their area related problems to the corporator

Keyword :- Nagarsevak Web Application, Swachh Bharat Abhiyan, Corporators Site.

1. INTRODUCTION

In Nagarsevak web application a problem of public such as

- Hole on a In road.
- Electric wire is break on the roadside area

Wastage garbage looking on the roadside which was not cleaned before many days.

- Suppose a polluted company found in the area that is not allowed to the development area,
- The parking is full near the roadside so that all complaint will be proceeding by public to this application.
- Street light is off on your area.

The alert message is going to the nagarsevak so that they can solve that problem and upload that photo to that site.

By this way public noticed that can the nagarsevak solved the problems of public and if supposed the solved the problem click the photo and upload on the site so that public knows the problem was solved and the government will work. We can prevent the life of a people by the any type of accident, we can make a clean and greenery area.

2. LITERATURE REVIEW

Just we are passing from a road side of some Nagpur areas and we found that one accident Because of road hole on a road and another reason is that we got some polluted companies in a some areas because of that it is more harmful to the people of that area and one most another reason is that peoples are going to nagarsevak office for the need of water tanker due to the shortage of water in summer.

Now we have to decided to overcome this problems and take a survey of Nagpur areas and we got same problems which are facing of that area people like a hole on a road, sewage lines gets blocked because of flooding, hanging of street light wires which is dangerous, garbage found on the road side, trees are falling on the the road when cyclon.

There is Nagpur Water, Swachta-MoHUA, Moryaa NMC Nagpur applications is there but we are giving another services apart from this applications. Like direct alert message on the nagarsevak mobile so that they take actions on that problem immediately and online tanker booking.

India is known as one of the most heavily settled countries in the world. It appears to be the second country to have the highest number of residents. With the total population of about expected data 1.37 billion in 2019. The management of Municipal Solid Waste (MSW) in India has encountered problems. Each year, the population grew by 33.5%.

This paper emphasizes the waste characteristics, techniques, adverse environmental impacts, poor waste management practices and also problems associated with the solid waste management system at the municipal level. In his report they discuss about the Qualitative and quantitative analysis, characteristics and composition, disposals and treatment of Municipal Solid Waste. The study is concluded with a few fruitful suggestions, which may be beneficial to encourage the competent authorities/ researchers to work towards further improvement of the present system.

Nagarsevak web application is a online web portal in which the people can directly complaint corporation related problem by using this portal. Nagarsevak web application provide a specific medium to the corporator to interact with the people. it is very useful to make good impression on people the of corporator (Nagarsevak). if the hole was in the middle of road then it create lots of road related problems like accidents, Traffic jamming, etc and it is a responsibility of corporator but due to his busy shedule he will not able to locate or identify particular problem of that area.

3. PRAPOSED SYSTEM

A problem is observe by the public and take a photo of that area or a particular area then post on the website. Alert message is going to the Nagarsevak on their mobile. Nagarsevak will inform to NMC or visit themselves as possible. A problem solve within minimum days and upload a photo of solved problems. We will know about the working of corporator how much they solved the problems or not solved.

4. CONCLUSION

The “Nagarsevak web Application” web portal will overcome above mentioned issues and will provide the solution to the normal people and reduces the rates of the accident. Our web portal is more easily usable than previously existing Portals. The Water Tanker booking feature in the Portal is helpful for Booking Tanker Online. It provides a fastest and easy way to book water tanker for a particular area.
