2.1 Overview

Brutality against women isn't always completely an outcome of orientation members of the family that expects guys to be higher than

women. Given the sub-par popularity of women, a number of orientation viciousness is. notion approximately traditional and appreciates social authorization. Launches of savagery include real hostility, similar as blows of differing power, becks, had a cross at hanging, sexual. misuse and assault, cerebral viciousness thru cuts, downgrade, impulse, coercion, useful or enthusiastic entanglements, and command over discourse and lead. In outrageous, but all of the equal not. difficult to understand cases, passing is the outcome. (Adriana, 1996) These declarations of brutality take. location in a man-female courting internal the family, nation and society. By and large, homegrown animosity toward women and younger women, due to first-rate motives stay resigned.

Social and social variables are related to the flip of activities and proliferation of fierce gestor. With numerous cycles of socialization that people endure, guys take in wiped out orientation spots of mastery and manipulate, while. girls take in that of accommodation, reliance and regard for power. A womanish youngster grows up with a normal feeling of being powerless and searching insurance, whether or not or now no longer or now no longer physical. social or productive.

The family and its useful unit are the place where the kid is presented to distinctions in sexual orientation since birth, and lately without a doubt before birth, as copulation assurance tests driving.to feticides and womanish child murder. The home, which should be the most reliable. place, is the place where ladies are generally

presented to viciousness.

4.   **Woman's Security Panel Search Algorithm**

A couple of various methods of doing this:

The quicker one (overall performance wise) is: select *FROM Table in where keyword LIKE

'%value%'. The trick on this one is the placement of the % and that's a wildcard, announcing either seek the entirety that ends or starts off evolved with the value.

An extra bendy but (slightly) slower one should

be the REGEXP function:

Select * FROM Table WHERE keyword REGEXP 'value'.

This is the usage of the strength of ordinary expressions, so that you should get as tricky as you wanted with it. However, leaving as above offers you a "bad man's Google" of sorts, permitting the seek to be bits and portions of normal fields.

Preliminary Result

Several experiments were conducted to try out the functionalities and effectiveness of the web-based women's security. The tests were conducted on the functionality of the women's security planning system
